1948 RETAIL PRICE LIST - CACTUS AND SUCCULENTS

Thank you for the many orders and requests for catalogs we have received from you. We are returning the money and stamps which many of you sent with your requests since this price list is free of charge.

In many cases the stock which we have available is limited. We therefore feel that it would be to your advantage to list a number of alternates with your order.

CACTI

- ACANTHOCEREUS colombianus - Specimen plants 1.00 and 2.00  
 " hondurensis - Specimen plants 1.00 and 2.00  
 " horridus - Specimen plants 1.00 and 2.00  
 " maculatus - 3 angled stems, brownish color dotted with gray spots .50, 1.00 and 2.00  
 " pentagonus - Specimen plants 1.00 and 2.00  
 " pentagonus var. hondurensis - Specimen plants 1.00 and 2.00  
 APOROCACTUS flagelliformis - The "Rat Tail Cactus" .35  
 ASTROPHYTUM capricorne aurea - Has yellow spines on the older plants. Small .40  
 " " larger specimens .75 and 1.00  
 " myriostigma coahuilensis - Flowering size 1.00  
 " " columnaris - Tallest of all .50. Flowering size .75 and 1.00  
 " " potosina - The "Bishop's Cap". Nice seedlings .35  
 " " flowering size .75 and up.  
 " " tamaulipensis - Flowering size 1.00  
 " " Tetragona - Usually four-sided. Flowering size 1.00  
 " ornatum - "Star Cactus". Yellowish brown spines .35  
 BERGEROCACTUS Emeryi - Specimen plants .75  
 BINGHAMIA chosicensis - Yellow spines .50  
 BORZICACTUS aurivillus - .50 and 1.00  
 " Humboldtii - Seedlings .35  
 CARNEGIEA gigantea - "Arizona Giant Cactus". Seedlings .35  
 CEPHALOCEREUS Palmeri - .50, .75 and 1.00  
 " senilis - "Old Man Cactus". Pure white bristly hair .25  
 CEREUS hybrid seedlings for grafting stock 3 to 4 inches in height 1.00 per 10 plants, 1 plant .15  
 " monstrosus hybrids - A monstrose form making odd irregular growths. Small .25, larger .50, specimen plants 1.00 and 2.00  
 CHAMAECEEREUS andalgensis - Specimen plants .50  
 " Silvestrii - "The Peanut Cactus". .25, clusters .35  
 CLEISTOCACTUS - A slender columnar type  
 " aureispinus - .35  
 " B aumanii - "Scarlet Bugler" .25, larger .35, specimen plants .50  
 " Herzogianus - Rare 1.50  
 " smaragdiflorus - Flower tipped with green 1.00  
 " Strausii - "Silver Torch". Erect showy plants with bristly spines. .25 and specimen plants 1.00  
 " tupizonensis - Specimen plants 1.50  
 CONSOLEA rubescens - Grows treelike with chocolate pads nearly spineless .35  
 " spinosissima - Dense whitish spines .50  
 CORRYOCACTUS brevistylus - Specimen plants 1.00  
 " brachypetalus - Specimen plants 1.00  
 " melanotrichus - From the high Andes. Specimen plants 1.00  
 CORYPHANTHA. Globular or cylindric type, particularly well adapted to pot culture.  
 " bumania - Round tubercles, flowers yellow .25  
 " cornifera - Tubercles overlapping like a pine cone, flowers yellow .50  
 " echinidea - Small growing, flowers rose-colored .25  
 " erecta - Grows tall, branching at base. Specimen plants .50 and 1.00  
 " Georgii - Purplish red when young. Yellow flowers .35  
 " pallida - Short thick tubercles, flowers yellow .50  
 " scotymoides - From Central Mexico .30

- DENDROCEREUS nudiflorus - Fine specimens 1.00
- ECHINOCACTUS. Sturdy "Barrel Cactus"
- " Grusonii - "The Golden Barrel". Specimen plants 1.00. Prices on large show specimens quoted on request.
- ECHINOCEREUS. The "Hedgehog Cactus".
- " Blanckii - Slender trailing stems, flowers purple .25, specimen plants .7
- " Boyce-Thompsonii - .25
- " pacificus - .35
- " pentelophus - Slender produmbent. Flower purple .35
- " salm-dyckianus - Orange colored flowers which last nearly a week and remain open at night. Rare 1.00
- " salm-dyckianus var. noctiflorus - Rare 1.00
- " Scheeri - Slender with long tubed flowers of deep pink, also stays open at night .35
- " species nova - From Sonora, Mexico. Grows in small clusters, flowers yellow .50
- ECHINOPSIS or "EASTER LILY CACTUS". Flowers extremely large. Easiest of all cactus to grow.
- " calochlora - Shiny golden green color. Flower white .35, larger .50 specimen plants 1.00
- " Eyresii - Sturdy with very short spines and white fragrant flowers .25 larger .35, flowering size .75
- " Huottii - Short columnar type from Bolivia. Flowers large, white in center pink outside .25
- " multiplex - Producing large pink, fragrant flowers throughout summer. Small plants .25, larger .50
- " hybrid ducor - Flower pink .35, flowering size 1.75
- " "Heavenly Twins" hybrid - Bears large double pink flowers .50, flowering size 1.00
- " hybrid makla - Free flowering with medium size orchid pink blossoms .35 flowering size 1.75
- " "Rosca" hybrid - Dark green with rose pink flowers .50
- " hybrid splendora - Large pink flowers shading paler toward center .35 flowering size 1.00
- ERIOCEREUS Bonplandii - Fastest growing and most robust of all, also largest flowers .25, specimen plants 1.00
- " Jusbertii - Specimen plants 1.50
- " Martinii - Profuse bloomer .25, specimen plants 1.00
- " pomanensis - Rare one from Argentina .50
- " Regelii - Flowers deeply tinged with pink .35
- " tortuosus - Has stouter heavily armed branches .35
- ESPOSTOA lanata - "Snow Ball Cactus". Plant covered with pure white wool .25 larger .50
- FACHEIROA blossfeldiana - Seedlings .30
- FEROCACTUS \* "Barrel Cactus" are globular or elongated after great age, heavily armed with attractive spines.
- " acanthodes - "California Fire Barrel". Seedlings .25, small .50 five inch specimens .75. Large exhibition specimen on request.
- " rectispinus - .50 and 1.00
- " Stainesii - Pretty Mexican species .35, specimen plants .75
- FRAILEA. "Midget Cactus" - Smallest growing of the cactus family with small yellow flowers.
- " Schilinzkyana - Rare .50
- GYMNOCALYCIUM. South American cacti, globular or flattened, ribs raised into protuberances, pointed below as in a chin, called "Chin Cactus".
- " Andraea - Bright yellow flowers .50
- " denudatum - Flowers white or pinkish .50 and .75
- " Loezanum - .50
- " loriotum - Large, heavy drooping spines .50
- " Quehlmannum - White or pinkish flowers .50
- " saglionum - Large plants 1.00 and up depending on size.
- " Ursolinum - .50
- HAMATOCACTUS setispinus. Easily grown Texas cacti, flower yellow with red center followed by brilliant red fruits .25, .35 and .50
- HARRISIA gracilis - Specimen plants .75
- " oriochra - Specimen plants .75
- H ELOCEREUS speciosus. Erect triangular stems, brilliant scarlet purple-tinged wide flowers. Parent of most hybrid Epiphyllums. Good pot subject .35, medium .75, flowering size specimens 2.00

- HYLOCEREUS. Climbing, tropical, shade loving cacti, large white nocturnal flowers.
- " *antiguensis* - Unrooted cuts .50
  - " *costaricensis* - .75
  - " *Ocamponis* - .75
  - " *polyrhiza* - .75
  - " *undatus* "Honolulu Queen" - .75
- LEMAIREOCEREUS. Tall growing tree-like, from Mexico. Make fine attractive specimens.
- " *B oneckii* - "Silver Tip". Grayish green skin with frosted white waxy covering. Short black spines, undulated ribs. Fast growing. Recommended highly. Sturdy plants .50, specimens 1.00
  - " *chlorocarpus* - Rare .50
  - " *Dumortieri* - Specimen plants 1.00
  - " *Godingianus* - Specimen plants 1.00
  - " *marginatus* - "Pipe Organ". Closely set short spines form a distinct margin along edges of the broad flattened ribs. Specimen plants 1.
  - " *pruinosis* - Fast growing four or five angles, later grayish or pruinose in color .25, .35 and .50
  - " *stellatus* - Specimen plants 1.00
- LOBIVIA. Genus of small growing plants. Colorful day blooming flowers.
- " *aurea* - Large golden yellow flowers .35, larger .50
  - " *B ackebergii* - Light green body, nearly spineless, flower carmine .35
  - " *Binghamiana* - Small clustering bright red flowers .25, .50, specimens 1.00
  - " *Drijveriana* var. *aurantiaca* - .50 and specimen plants 1.00
  - " *famatimensis* var. *nigricans* - .50 and specimen plants 1.00
  - " *Hertrichiana* - Fast growing, offsets freely, red flower .50, .75 and 1.00
  - " *Higginsiana* - .50
  - " *pseudocachensis* - Small clustering harmless spines, flower red .50
  - " *rebutioides* - Chocolate brown body, flower citron yellow .75
  - " *rubescens* - Young spines reddish, flower yellow .50, flowering specimens 1.50
- LOPHOCEREUS *Sargentianus* - Specimen plants 1.00
- " *Schottii* - Four to five angled, bordered on ribs with dark spines .25, .50 and specimens 1.00
  - " *Schottii* forma *monstrosus* - Specimen plants 1.50
- LOPHOPHORA *Williamsii* - "Dope Cactus". Large flattened gray green ribs dotted with tufts of silky hairs, frequently bears small pink flowers, a "Must Have". Small .50, specimen plants .75
- MACHAEROCEREUS *crucis* - "Creeping Devil Cactus" - 1.00
- MAIHUENIA *poepigii* - Rare Chilean species .75

#### MAMILLARIA

A genus of small growing cacti, low, rounded or elongated, bearing flowers in a circle around the top of the plant, ranging in color through white, yellow, pink, red or magenta. Best adapted to small pot, bowl or indoor culture.

- MAMILLARIA *bocasana* - "Powder Puff" covered with white silky hair, bears creamy yellow flowers, forms clumps as it grows older .25, .50, specimen clumps 1.00
- " *centricirrha* (*magnimamma*) - .25
  - " *chinocephala* - Globular with whitish dense spines .25 and .50
  - " *compressa* - Tubercles angular and large with long white spines .25
  - " *decipiens* - Small green body making many offsets .50
  - " *durispina* - Heavy brownish spines, flower carmine, good grower .25
  - " *elongata* - Slender, finger-like stems, short yellow spines, branches freely, flower white star-like .25, .35 and clusters .50
  - " *elongata* var. *echinus* - .35 and .50
  - " *fragilis* - Miniature plant .25
  - " *fragilis* var. *minima* - Smaller than the above .25
  - " *Haageana* - Dense white spines, brown centrals, bears circle of rose-colored flowers around tip .25 and .50
  - " *microhelia* - "Little Sun". Golden radial spines, forming dark centrals as it grows .25, .35 and specimen plants .75
  - " *multiceps* - .25
  - " *nigra* - .25
  - " *Parkinsonii* - White spined with brown tipped radials, heads divide as plant grows older forming clumps .50, .75, 1.00. Larger on request.
  - " *perbella* - Globular with tiny white spines and pink flowers .25
  - " *Saffordii* - .25
  - " *texana* - .25
  - " *Vaupellii* - Fine species, flowers red .50 and specimen plants 1.00
  - " *Zeyeriana* - Large growing with dense, whitish-gray spines .25

- MELOCACTUS. Barrel type topped with a cephalium from which the flowers and fruits appear. Small plants as offered below have not yet developed this organ.  
 " intortus - "Turk's Cap". From West Indies. Resembles Echinopsis but body is shaded with green, red and bronzo topped with tan and brown spines .40
- MONVILLEA. Slender upright, having large white night blooming flowers. Closely allied to Corcus.  
 " Cavendishii - Free flowering. Seedlings .25.  
 " insularis - Native to an island off the coast of Brazil .75  
 " Spogazzinii - Slender gray-green stems with black spines. Attractive .25  
 " " and Corcus azureus cross - .75
- MYRTILLOCACTUS geometrizans - Specimen plants 1.00  
 " geometrizans --S var. cochal - Specimen plants 1.00
- NEOPORTERIA subgibbosa - Interesting Chilean plants .35
- NOTOCACTUS Leninghausii - "Golden Ball". Fine hair-like golden spines .35, .50 and specimen plants 1.00  
 " mammulosus var. pampeanus - .25 and specimen plants .75 and 1.00  
 " Ottonis - "Indian Head". Earliest to flower of Notocactus .35 and specimen plants .75 and 1.00  
 " scopia - "Silver Ball". Bright silvery spines tipped with red. Small, .25, larger .35, flowering size .75 and 1.00  
 " mammulosus var. submammulosus - Flat strong spines, flowers large .25
- OPUNTIA basilaris - "Beaver Tail". Gray-green or reddish color. Large ruffled pink to rose flowers. Stands considerable cold and snow .25  
 " cylindrica - .25  
 " olata - "Orange Tuna" .25  
 " erinacea - "Grizzly Bear". California species with long white bristly spines. Large yellowish pink flower. Quite hardy. Recommended highly. .25  
 " fragilis - Hardy all over the U. S. 125  
 " fulgida - .25  
 " lagopus - Erect cylindrical stems covered with wool and spines. Rare 1.00  
 " mamillata cristata - "Boxing Glove". Club shaped branches form crested forms and odd shapes. Small .20, larger crests .35, giant specimens 1.00  
 " microdasys - "Rabbit Ears". Tufts of short yellow spines in dots regularly distributed .20  
 " microdasys var. alba - A white fuzzy variety .25  
 " monacantha - Small rooted stems .20. Rooted fruits .20  
 " monacantha variegata - "Joseph's Coat". Curiously variegated with patches of red, green and yellow .35  
 " rufida - Bears reddish tufts of glochids .25  
 " Schickendantzii - Erect thin light green stems .25. Rooted fruits .25  
 " serpentina - Cylindrical, knobby branches twist about in snaky manner .25  
 " serpentina cristata - Fine crested form of above making odd fan-shaped branches .60  
 " subulata - Small .25, larger .50  
 " vestita - "Old Man Opuntia" .25, larger .50  
 " vilis - Small plants grow like little branched trees, suitable for bowl or window garden .20  
 " glomarata - "Paper Spine Opuntia". About 1" in diameter .45, smaller .25  
 " glomerata var. Turpinii - larger diameter, light green .50 and 1.00
- OREOCEREUS Celsianus - "Old Man of the Andes". Colorful spines and long hair. Best in full sun .50, large exhibition specimens 1.00 and 2.00 according to size  
 " fossulatus - Not quite so hairy, branches from base. Taller and faster growing than the former 1.50
- PARODIA Stuechlii - Reddish hooked spines .30
- PERESKIOPSIS chapistlo - Unrooted cut .50  
 " Gatesii - Unrooted cut .50  
 " Porteri - Unrooted cut .50  
 " velutina - Unrooted cut .50
- PILOCEREUS. Columnar often hairy at the growing tips with attractive spine formations. Rarities for the advanced collector.  
 " alensis - .75  
 " catingicola - From the Brazilian catinga or thorn brush country .75  
 " glaucescens - Blue body with light yellow spines .75  
 " Hurstii - .75  
 " Palmeri - .75  
 " piauhyonensis - .75
- RATHBUNIA lealamosensis - .50, larger 1.00  
 " Kerberi - .50, larger 1.00  
 " sonorensis - .50, larger 1.00

- REBUTIA. "Pigmy Cactus". Tiny South American cacti. Brilliant colored flowers. Suitable for pots or bowls.
- " kupperiana - pretty plant, red flowers .50
  - " Steinbachii - Dark body, dark red flowers .35.
- RHIPSALIS - "Mistletoe Cactus". True epiphytes. Suitable for hanging baskets and shade.
- " cereuscula - "Popcorn Cactus". Masses of short stems tipped with bristles growing on tips of long pendant branches .40
  - " Houlettiana - Flattened stems, deeply cut, flowers cream colored with red eye, fruits red .50
- SELENICEREUS. "Moon Cereus". Slender twining cacti which grow to considerable length. Flower at night. The following prices are for unrooted cuts which grow rapidly and root easily. Or we will root them to order for twenty cents extra.
- " Boeckmannii - .40
  - " brevispinus - .50
  - " coniflorus - .25
  - " Donkeiaeri - .75
  - " grandiflorus - .40
  - " hamatus - .25
  - " hondurensis - .75
  - " insularis - .75
  - " Macdonaldiae - .35
  - " mallaschii - .50
  - " pseudospinosus - .40
  - " spinulosus, purple flower - .25
  - " spinulosus, white flower - .25
  - " Urbanianus - .50
  - " vagans - .75
  - " Wercklei - .50
- STENOCACTUS (Echinofossulocactus). Distinctive with numerous thin wavy ribs and numerous small white, yellow and pink flowers. Sturdy, easily grown.
- " coptonogonus - .35
  - " Lloydii - .40
- THELOCACTUS. Globular Mexican cacti. Sturdy, free flowering with quite large flowers.
- " Buekii - Large tubercled brown spined, small ones .35
  - " subterraneus - .50
- TRICHOCEREUS. Sturdy growing, suited for large gardening effects, large pot plants, extra large white nocturnal flowers. Like full sun, rich soil.
- " argentinensis - Specimen plants .75 and 1.00
  - " Bridgesii - Bright green body, grows tall and slender, branches from base .75 and 1.00
  - " candicans - .55 and larger .75
  - " chiloensis - An attractive one from Chile .75
  - " coquimbensis - Low growing densely spined 1.00
  - " Knuthianus - Specimen plants 1.00
  - " lamprochlorus - Low growing forming clusters of many stems .35
  - " macrogonus - Fast growing, thick stemmed, used as grafting stock for heavy plants 1.00
  - " Pachanci - Bright green stems, almost spineless, fast growing 1.00
  - " poco - Brownish gold spines, colorful .50
  - " pusquillo - 1.00
  - " Schickendantzii - Forming low dense clusters, best adapted to pot culture .25, .50 and specimen plants 1.00
  - " Shaferi - Low growing, flowers large white .25, .50 and specimens 1.00
  - " Spachianus - Fast growing. One of the best for grafting stocks .50 and 1.00
  - " thelegonus - Specimen plants 1.00
- WEBEROCEREUS Bickleyi - 1.00
- " tunilla - 1.00
- WEINGARTIA. Globular from the Argentina - Bolivia boundary.
- " Fidaiana - Very rare 1.00
  - " Neumanniana - 1.00
- WERCKLEOCEREUS glaber - .50
- WILCOXIA. Weak slender stems growing from tuberous roots, pink or reddish flowers.
- " viperina - Strongest grower .50
- ZYGOCACTUS truncatus - "Christmas Cactus". Likes shade, rich well-drained soil. .50 and specimen plants 1.00

-6-  
SUCCULENTS

- ADROMISCHUS clavifolius - Small clusters of thick, club-shaped brown spotted leaves .50
- " Cooperi - "Plover Eggs". Similar to above but with longer leaves .35, larger plants .50
- " festivus - .25
- AEONIUM arboreum - B right green rosettes .25
- " arboreum var. atropurpureum - Like the above except the leaves turn purplish red in full sun .25
- " Cooperi - A compact bushy type bearing attractive rosettes at tip of each branch .25
- " decorum - .25
- " haworthii - Similar to A. Cooperi but gray green .25
- AGAVE Americana var. variegata - Attractive gray green and yellow striped leaves. Grows large .50
- " sisaliana - .50
- " fernandi-regis - Small growing .50
- AGRINICTUS agninum - "Lamb's Tongue". Grey green leaves forming compact clusters. Small .25, larger clumps .50
- ALOE arborescens - "Torch Plant". Brilliant spikes of orange red flowers .75
- " beguinnii - Unusual Aloe, resembling huge Haworthia. Numerous narrow leaves dotted with white tips ending in transparent bristle .25 and 1.00
- " brevifolia - Short gray-green leaves with edges toothed with short white spikes, flowers red .25
- " echinata - .25
- " ferox - .25
- " globosa - .25
- " humilis - A low growing short leaved one .25 and specimen plants .50
- " humilis var. incurva - A dwarf form, leaves gray-green toothed. Flowers orange-red .35
- " humvir - .25
- " nobilis - Bright shiny green .25
- " variegata - "Partridge Breast". Most beautiful of all Aloes. Flowers orange-red. Small plants .25, larger .35 and flowering size 1.00
- ANACAMPSEROS arachnoides - A dwarf form with leaves covered with cobwebby hair .25
- " rufescens - Similar to the following .25
- " telephiastrum - "Sand Rose". Forms clumps of compressed rosettes, short pointed dark olive-green leaves, pinkish at base, large red flowers .25
- BYRNESIA Weinbergii - "Ghost Plant". A pretty silvery gray rosette .25
- BRYOPHYLLUM "Kelly's Hybrid" - Rapid growing with large colorful flowers .25
- " scandens - Off climbing species with mouse colored flowers and foliage .35
- " tubiflora - Tubular brown marked leaves, flowers during the winter months, orange-red flowers .25
- CARRUANTHUS caninus - Leaves toothed like a Faucaria. Flowers yellow .35
- CEPHALOPHYLLUM alstonii - Clusters of gray pencil-like leaves, red flowers .35
- " velutium - Long fleshy flexible leaves, forming clusters, bearing yellow flowers .30
- CEROPEGIA Woodii - "Umbrella Flower". Slender drooping stems with heart-shaped leaves, flowers pinkish brown. For hanging basket or pot .25
- CHEIRIDOPSIS candidissima - African plant having pairs of white leaves resembling goat's horns. A "Must Have" for rare collections. Small .25, large .75
- " aspera - .35
- " velutina - .35 and larger .75
- COTYLEDON Barbeyi - .25 and .50
- " orbiculata - .25 and .50
- " orbiculata variegata - .25 and .50
- " papillosa - .25 and .50
- " undulata - Fast growing, bears orange-red flowers .25
- CRASSULA arborescens - Grey green leaf edged with red .35
- " argentea "Jade Plant" - .25
- " dejecta - Erect with leaves in four vertical pairs, reddish in full sun .25
- " deltoidea "Silver Beads" - Grayish white leaves .25
- " chrysacantha - .25
- " falcata "Aeroplane Plant". Curious gray-green leaves resembling blades of aeroplane propellers, bears scarlet to orange-red flowers .35
- " hemisphaerica - .35
- " imperialis - resembles C. pyramidalis .25

CRASSULA lycopodioides - many stemmed clusters of bright green resembling club moss .25

- " obtusa - .25
- " perfossa "Button on a String" - .25
- " pseudolycopodioides - Dark green .25
- " rubiflora - .25
- " rubiflora cristata - .25
- " sp. "Pagoda Plant" - Resembles oriental building .25
- " teres - Thick succulent leaves clasp at base, forming rounded column .50
- " tetragona - Erect shrubby, tree-like. Light green leaves and bare brown stems .25

CYANOTIS somaliensis - "Pussy Ears". Trailing plant with triangular leaves .25

DYCKIA sulphurea - Shiny green rosettes of sharp denticulate leaves. Belongs to pineapple family .25 and specimen plants 1.00

ECHEVERIA agavoides hybrid - .25

- " amoena - "Hens and Chickens". Small one with light green leaves tinged with red .25
- " bradburiana - gray-green rosettes .25
- " derenbergii - "Painted Lady". Neat rosettes with attractive short stemmed flower stalks .25 and larger .35
- " Doris Taylor - Green leaves covered with fine white hairs. Attractive .25
- " elegans - Pearly blue-white leaves .25
- " expatriata - A small one .25
- " gilva - Thick yellow-green leaves .25
- " Hoffmannii - large wax-like, light green leaves with wavy edges 1.00
- " Hoffmannii cristata - 1.00
- " kewensis - .25
- " microcalyx - .25
- " multicaulis - Much branched one, each branch tipped with rose-like clusters of dark, shiny green and red leaves. Very showy and grows well .25
- " nodulosa - Tall growing, shrubby type with reddish striped leaves. Very odd .30
- " perbella - Yellow-green meaty leaves .25
- " pulvinata - "Chenille Plant". Small shrub type with light green leaves covered with white hairs, red tipped in winter .25
- " pulviver - Richly colored plush-like leaves .25
- " set-oliver - Dark green velvety leaf edged with red .25
- " setosa - Bright shiny green leaves covered with fine white hairs. Very attractive. Likes shade .25
- " turgida - Small tight rosette, leaves tipped with purplish-red. "Ground Roses" .25

EUPHORBIA. Mostly native to African deserts, much prized by collectors of rare and unusual plants.

- " Bergeri - Many serpentine branches from a central head .75
- " canariensis - .50 and 1.00
- " caput-medusae major - Larger growing form of more irregular habit. Small rooted cuts .35, larger .50
- " caput-medusae minor - Small rooted cuts .35, larger .50
- " cereiformis - Erect, many-ribbed, branches freely .25 and specimen plants .75 and 1.00
- " echinus - Has club-shaped stems with spines .35
- " frankiana - Erect cactoid in appearance .25 and specimen plants .75
- " inermis - .50 and 1.00
- " Hermentiana - .35 and specimen plants 1.00
- " lemnaiana - .35
- " mammillaris - "Corn Cob". Popular and easily grown .25, specimens .75
- " obesa - 1.00
- " ornithopus - .50
- " pentagona - Erect branching bright green stems with yellowish spines .35 specimen plants .75
- " pseudocactus var. lactea - Four-angled armed with spines of cactus-like form. Rooted cuts .40
- " pseudoglobosa - Clusters of small joints . Rare 1.00
- " resinifera - Four-angled gray-green stems forming clusters. A fast grower and hardy. Single stems .35, specimen plants 1.00
- " splendens - "Crown of Thorns" - .35
- " stellaspina - Clavate stems with spines which have a star-like spine growth. Cuts to order only .50

(Euphorbias continued on next page)

- EUPHORBIA *stolenifera* - .35  
 " *submamillaris* - Low growing and freely branching. Small plants .30  
 " *tubiglans* - 1.00  
 FAUCARIA *albidens* - .25  
 " *Boscheana* - .25  
 " *hybrids* - .25  
 " *tigrinia* - "Tiger's Jaws". Curious succulent with thick, juicy leaves edged with hairless tooth-like projections. Forms clusters .25  
 " *tuberculosa* - Attractive roughened leaves .25  
 GASTERIA *Armstrongii* - Small .25, larger .50  
 " *excelsa* - Sturdy compact thick spotted leaves .25  
 " *hybrids* - Curious thick dark green leaves arranged in pairs, dotted with tiny raised pearl-like markings. "Ox Tongue" .25, flowering size .50 and specimen plants 1.00  
 " *Neliana hybrids* - .25  
 " *verrucosa hybrids* - .25  
 GLOTTIPHYLLUM *linguiforme* - "Tongue Leaf". Bright green bearing large yellow flowers .25  
 GREENOVIA *gracilis* - Yellowish green rosettes, forms clusters, from the Canary Islands. Desirable .25  
 HAWORTHIA. Small growing South African plants with clusters of pointed or blunt leaves, forming rosettes. Finest of plants for small containers.  
 " *attenuata* - Warty .35  
 " *bilineata* - .50  
 " *Chalwinii* - Dark green, small .35  
 " *coarctata* - Dark green, stiff pointed leaves .25  
 " *cuspidata* - Thick blunt pea-green leaves, surface dotted with transparent spots, grows in clumps .25  
 " *cymbiformis* var. *obtusa* - Rare 1.00  
 " *decipiens* - .75  
 " *denticulata* - Windowed .25  
 " *fasciata* - .35, .50 and 1.00  
 " *integra* - .75  
 " *margaritifera* - "Wart Plant". Dainty rosettes of leaves dotted with white tubercles .25, .50  
 " *minima* - Small, light green, transparent, windowed leaves .50  
 " *paradoxa* - .25  
 " *radula* - Fine white dots .35  
 " *Ryderiana* - .75  
 " *tessalata* - Short thick dark colored leaves in three series marked with veins transparent above .30  
 " *tessalata* var. *Engleri* - .50  
 " *tortuosa* - .50  
 " *tortuosa* var. *subrigida* .50  
 " *turgida* - Smooth windowed leaves .30  
 HEREROA *Dyeri* - .25  
 " *granulata* - Clusters of long, keeled, roughened, dark green leaves. Flowers yellow .35  
 " *Nelii* - "Elk Horns". Bright green leaves in pairs, curved, flattened and notched at the ends .25  
 JUTTADINTERIA *korii* - Fleshy light green keeled leaves, flowers yellow .25  
 KALANCHOE *Blossfeldiana* - Small .25, larger .50  
 " *fedtschenkoi* - .25  
 " *fiquiredoa* - Scalloped edge from Mozambique - Specimen plants 2.00  
 " *pinnatum* - Small .25, larger .50  
 " *somaliensis* - Broad notched leaves shaded with red, yellow or orange and green according to season - .25  
 " *tomentosa* - "Panda Plant". Silver gray velvety leaves with brown trimmings. Small .25, larger .35  
 " *Welwitschii* - Purple leaves .50  
 KLEINIA *articulata* - "Candle Plant". Erect blue-green stems topped by leaves when which growing which fall off during the dormant period .25  
 " *pendula* - "Inch Worm Plant". Arched creeping stems, roots as it touches the soil. Red flowers .40  
 " *repens* - .25  
 " *tomentosa* - Short pointed cylindrical leaves of pure white. Very rare .35  
 MESEMBRYANTHEMUM *aureum* - Grows into shrubby mounds, orange flowers in spring .25  
 " *roseum* - .25  
 " *Schiokii* - .25

- NANANTHUS Pole-Evansi - .30  
" rubrolineatus - .25  
" vittatus - .25  
PACHYPHYTUM bracteosum - Thick rounded whitish gray leaves in rosettes .60  
" compactum - "Tower of Jewels". Small rosettes of dark green leaves with grayish-white coating .25  
PACHYVEVIA Clevelandii - Purplish leaved hybrid .25  
" Haagii - .25 and larger .50  
" "Kelly's Hybrid" clavifolia - .35  
" Orpettii - Striking colors ranging from light pink to dark purple, according to season and age .35  
" Schiedeckeri - .25  
" Schiedeckeri var. cristata - Pearl-gray leaves with a bluish cast .25, crests .35  
PLEIOSPILOS Bolusii - "Living Rock". Large, thick, rounded leaves resembling a pair of greenish brown stones, yellow flower .25, flowering size .75  
" magnipunctatus - .35  
" Nelii - Smoother and more colorful flowered than above species .25  
" simulans - Broader leaves than above, keeled on the lower side. Flowers pale yellow to orange .25, larger branched clusters .50  
PORTULACARIA afra - Shrubby plants with round shiny small leaves, attractive in small bowls .25  
" afra variegata - "Rainbow Bush". Variegated form. Plant stem purplish-red, leaves cream and pale green with a red margin. Worthwhile .25  
RHOMBOPHYLLUM rhomboideum - Gray-green leaves with whitish edges forming tufts of stemless rosettes close to the ground. Flowers yellow .25  
SANSEVERIA abyssinica hybrids - .50  
" cylonica - .25  
SEDUM Adolphii - Low shrubby, thick lemon yellow leaves of colorful appearance .25  
" allantoides - .25  
" altissimum var. latifolium - Gray-green clumping sort .25  
" confusum - Attractive golden green foliage .25  
" guatemalense - "Xmas Cheer". Fast growing densely branched with shiny green red-tipped leaves - .25  
" lineare variegatum - .25  
" Morganiamum - "The Burro's Tail". Leaves pastel creamy-yellow-green. Good for hanging baskets. Small branched plants .35  
" multiceps - "Baby Joshua Tree". Unique for landscape effects in bowls .25  
" pachyphyllum - Gray-green leaves with pinkish tips .25  
" prealtum - .25  
" reflexum cristata - .35  
" retusum - .25  
" Stahlia - "Boston Bean". Reddish-brown rounded leaves .25  
" Treleasei - Has bluish-green leaves with a trace of pink on tips .25  
SEMPERVIVUM arachnoideum - Cobwebby .25  
" arachnoideum var. Laageri - .35  
" Braunii - Similar to S. arachnoideum but with smaller, darker leaves .25  
" calcareum - Pale gray-green rosette, red tipped leaves edged with white .25  
" tectorum - .25  
STOMATIUM Fulleri - Thick, small toothed leaves, grass-green with pale gray dots forming clumps, blooms at night which is rare among succulents .25  
STAPELIEAE - These plants are members of a most unique plant family.  
CARALLUMA lutea - Yellow starfish - .50  
ECHIDNOPSIS (meaning viper-like) cereiformis - .35  
EDITHCOLEA grandis - Very rare and distinct 1.00  
HUERNIA keniensis - .40  
" Schneideriana - .35  
" transmutata - .40  
STAPELIA gigantea - "Giant Starfish Flower". One of the largest blossoms in the world is borne by this odd African plant .50  
" grandiflora - 5 to 6 inch purplish-brown hairy flowers .40  
" hirsuta - "Hairy Starfish Flower". .35 and .50  
" mutabilis - The changeable Stapelia .35  
" pasadenensis hybrid - .25  
" pulchella - Small mottled stems and flowers .25  
" variegata - "Starfish Flower". Short pointed stems with curious leathery flowers mottled brown and yellow. African oddity, very desirable .35  
" variegata var. minima - .35

EPIPHYTIC ORCHID BULBS

We are now able to supply you with epiphytic orchid bulbs. We have selected well-tested varieties which have been grown by collectors for many years. We will add the better hybrids in the future as they become commercially proven. These plants will provide you with rare and exotic blossoms throughout the year. We are sure that the experience of growing them will be a real thrill.

CHYSIS bracteosa - Lovely short arched sprays of fleshy white flowers - sometimes yellow-throated - about 3" across. Blooms in spring and is nice for hanging baskets. Is deciduous - sheds its leaves after flowering. \$3.50

EPIDENDRUM cochleatum - Cream with black throat - chartreuse tinge at times. 3" to 4" blooms. Is almost constant bloomer after established. Lip resembles shape of cochle shell giving variety its name. \$2.50

EPIDENDRUM nemorale - Deep orchid color with 3" to 4" flowers. Spring bloomer. Large beautiful sprays. Not as constant a bloomer as cochleatum but many prefer it for the color of the bloom. \$2.50

EPIDENDRUM Maria Amos - Lovely rare colored green with white throat. 3" to 4" blooms. Blooms in spring. \$2.50

LAELIA anceps - Orchid color with dark lip. 4 1/2" blooms in fall to December \$2.50

LAELIA autumnalis - Royal purple with 4" blooms. Fall and early winter bloomer. \$2.50

LAELIA Gouldiana - Royal purple - natural hybrid of anceps and autumnalis.

3 1/2" to 4" blooms with many flowers on spray. Blooms in fall. \$3.00

LAELIA Albida - White and fragrant. 2 1/2" to 3" flowers. Fall bloomer. \$3.00

LAELIA grandiflora (Majalis) - Orchid colors. 7" flower. Blooms in spring around Mother's Day. \$3.00

LYCASTE aromatica - Golden yellow. 2" flower. Free-flowering fragrant fall bloomer. \$2.50

ONCIDIUM Cavendishianum - Yellow with brown spots. Sprays have 12 to 15 flowers. Usually blooms first year. Fall bloomer. \$2.50

ONCIDIUM tigrinum - Golden yellow with brown spots. Blooms from April to June. Sprays have 12 to 15 flowers. Is good to use in a hanging basket. \$2.50

STANHOPEA tigrinum - Cream and brown. 5" to 7" blooms in summer from base of plant. Is good to use in hanging baskets. \$2.50

STANHOPEA Wardii - Peach. 3" blooms in summer from base of plant. \$2.50

VANDA teres - Sepals white, petals violet with rose lips, yellow at base spotted red. Climbing in habit with large 4" flowers which last 4 weeks or more. Blooms two or three times a year (not in summer). \$5.00

SPECIAL OFFER - Any four of the above \$2.50-bulbs and one Cattleya for \$10.00.

OSMUNDA FIBRE in which to plant the above bulbs - 1 pound required per plant \$.50  
Minimum order of 5 pounds if no bulbs are ordered.

REDWOOD BASKETS - Square 5" - \$.40, square 6" - \$.50. Redwood trellis - \$.40

Special instructions for culture of the bulbs will be included with each order.

WE WILL ISSUE AN EPIPHYLLUM PRICE LIST IN THE SPRING.

TERMS: Cash remittance with order - check, bank draft, money order or stamps. No. C.O.D.'s. Orders for less than \$1.00 must include 25% extra for packing costs. California customers must include 2 1/2% state sales tax.

Any plants which do not reach you in good condition will be replaced free provided we are notified within ten days from date of shipment, otherwise replacements cannot be made.

We suggest that you list a number of alternate cacti and succulent selections in case we are out of items of your first choice. If no alternates are listed substitutions of equally desirable plants will be made unless otherwise instructed.
